Summary

Highly accomplished UX/UI Designer and Frontend Developer with extensive experience in integrating UX strategy, interface design, and full-stack development to deliver innovative web products. Proven ability to transform complex product concepts into intuitive user flows, interactive prototypes, and production-ready applications using modern technologies such as React, TypeScript, and Next.js. Adept at leveraging AI-assisted workflows to enhance research synthesis, prototyping, and development cycles. Possesses a strong foundation in UX research, design systems, and usability testing, complemented by a track record of successful project delivery from inception to deployment.

Work Experience

Product Designer & Frontend Developer, Freelance / Self-Employed, Los Angeles

11/2016 – Present

- Spearheaded the design and deployment of responsive web products, portfolio systems, and AI-enabled tools by integrating UX strategy, interface design, and frontend development.
- Engineered production-ready experiences utilizing React, TypeScript, Next.js, Vite, Tailwind CSS, Supabase, Flask, Stripe, authentication protocols, and modern deployment workflows.
- Developed LitmusAI, an AI literacy platform featuring readiness assessments, personalized training modules, certifications, progress tracking, dashboard analytics, secure authentication, and integrated payment processing.
- Transformed product concepts into comprehensive user flows, wireframes, interactive prototypes, maintainable UI systems, and accessible frontend implementations.
- Leveraged AI-assisted workflows to expedite research synthesis, prototyping, code generation, debugging, and quality assurance, while meticulously documenting tradeoffs and edge cases.

Principal UX/UI Designer, Blue Shield of California, Oakland

04/2022 – 07/2025

- Directed UX strategy and execution for regulated healthcare web and mobile initiatives, translating ambiguous requirements into member-facing user flows, interactive prototypes, and developer-ready specifications.
- Crafted cohesive and inclusive user experiences across web and mobile platforms, optimizing task clarity, user confidence, and completion rates through rigorous usability testing.
- Produced detailed personas, journey maps, wireframes, high-fidelity prototypes, executive narratives, presentations, and infographics to foster stakeholder alignment and guide product prioritization.
- Established a library of reusable interaction patterns, UI specifications, and component guidelines, significantly reducing design and engineering ambiguity across responsive workflows.

- Fostered cross-functional collaboration with product, engineering, research, compliance, and business teams to ensure design decisions aligned with user needs and organizational objectives.

Frontend Engineer, CLLCTVE Inc. (Techstars Startup), Los Angeles

05/2020 – 02/2022

- Constructed responsive, mobile-first React.js interfaces and reusable Ant Design components for a creator platform supporting over 500 creators, 15 brand partnerships, and maintaining an 85% retention rate.
- Collaborated closely with designers to translate mockups and interaction concepts into pixel-perfect, production-ready user experiences.
- Executed user research initiatives and contributed to the prioritization of product enhancements, facilitating the successful launch of two high-demand features.
- Instituted a reusable component library that elevated design consistency and accelerated development timelines.

UX/UI Designer, IMPROV Learning, Woodland Hills

09/2018 – 10/2019

- Optimized responsive website layouts and marketing funnels using research findings and performance data to enhance engagement, content clarity, and conversion rates.
- Developed targeted email campaigns and digital assets, achieving a 20% increase in email open rates.
- Implemented A/B tests and iterative UX improvements to bolster usability, user retention, and clarity within the customer journey.

Freelance UX/UI Designer, A Different Kind of Creative – Doggy Date, Los Angeles

04/2017 – 07/2017

- Managed the complete UX/UI design lifecycle for an iOS social product, from initial character concepts and product flows through to high-fidelity interface design.
- Applied design thinking methodologies to architect user-centered experiences and partnered with an iOS developer via Zeplin to deliver precise specifications and assets.

Freelance UX/UI Designer, Tech Noir, Los Angeles

11/2016 – 12/2016

- Investigated user research concerning wearable technology purchasing behavior, focusing on the interrelations between aesthetics, user trust, and product functionality.
- Architected the primary user flow and key discovery pages for a specialized marketplace showcasing wearable technology designers and their products.

Education

Certification, Full Stack Web Development, UCLA Extension, Los Angeles

2020 – 2020

Certification, User Experience Design, General Assembly, Santa Monica

2016 – 2016

Associate of Arts, Graphic Design, The Art Institute of California, Los Angeles
