Summary

UX/UI designer with 10+ years across regulated healthcare platforms and startup web products. Led product design and frontend prototyping for Blue Shield of California's Health at Home, owning the member-to-PCP journey for a feature implemented by engineering. Brings experience with creator platforms, reusable interaction patterns, and collaboration across product, research, and engineering.

Skills

UX research and product design

UX strategy | Product strategy | UX research | Information architecture | User flows | Journey mapping | Personas | Wireframing | Rapid prototyping | High-fidelity UI | Usability testing | A/B testing | B2B design

Interfaces, systems and delivery

Interaction design | Design systems | Component libraries | Responsive design | Mobile UI design | Accessibility | Payment flow UX | Developer handoff | Stakeholder facilitation | Cross-functional collaboration | Agile methodologies

Design tools

Figma | FigJam | Adobe Photoshop | Adobe Illustrator | Adobe XD | Webflow | Zeplin

Frontend and AI prototyping

React | TypeScript | JavaScript | Next.js | HTML/CSS | GitHub | Frontend prototyping | AI-assisted development | Claude Code | Codex

Work Experience

UX/UI Designer and Frontend Developer, Freelance / Self-Employed, Los Angeles

Jul 2025 - Present

- Design and build web products from user flows and prototypes through frontend implementation and deployment.
- Designed and built LitmusAI, an AI-literacy platform with readiness assessments, personalized training, certifications, progress tracking, and integrated payments.
- Use Claude Code and Codex during prototyping and development, documenting tradeoffs and edge cases as product concepts become working interfaces.

Principal UX/UI Designer, Blue Shield of California, Oakland

Apr 2022 - Jul 2025

- Led UX/UI design for Health at Home, a Blue Shield feature for members to connect with in-network primary care providers online, with the goal of reducing clinic foot traffic during the pandemic.
- Owned the member-to-PCP journey from account connection through in-network provider search and online appointment scheduling; collaborated with project managers, research teams, and stakeholders on Figma designs.
- Built a frontend demo for engineering, which implemented the experience as a feature on a subdomain of Blue Shield's main website.
- Redesigned member journeys across web and mobile and validated designs through usability testing.
- Developed reusable interaction patterns and component specifications to support consistent implementation across teams.

Senior UX/UI Designer | Product Design

Work Experience Continued

Frontend Engineer, CLLCTVE Inc. (Techstars Startup), Los Angeles

May 2020 - Feb 2022

- Built responsive, mobile-first React interfaces and reusable Ant Design components for a creator platform supporting 500+ creators and 15 brand partnerships.
- Partnered with designers to translate mockups and interaction concepts into production interfaces and developed a reusable component library.
- Conducted user research and helped prioritize product enhancements, supporting the launch of two platform features.

UX/UI Designer, IMPROV Learning, Woodland Hills

Sep 2018 - Oct 2019

- Used research and performance data to improve responsive website layouts and marketing funnels; ran A/B tests to refine the customer journey.
- Created targeted email campaigns and digital assets, achieving a 20% increase in email open rates.

UX/UI Designer, A Different Kind of Creative - Doggy Date, Los Angeles

Apr 2017 - Jul 2017

- Designed product flows and high-fidelity interfaces for an iOS social product; partnered with an iOS developer to deliver specifications and assets through Zeplin.

UX/UI Designer, Tech Noir, Los Angeles

Nov 2016 - Mar 2017

- Researched wearable-technology purchasing behavior and designed the primary user flow and discovery pages for a marketplace of wearable-technology designers and products.
